

JUDITO N. PEPITO JR

COMPUTER ENGINEER

Santo Niño 2, Lamac, Consolacion, Cebu City, Philippines | 09661668608 | jude.apepito.e@gmail.com
<https://judsportfolio.netlify.app/>

PROFILE SUMMARY

Motivated and detail-oriented Computer Engineering graduate with experience in web development, IoT-based systems, and real-time data monitoring projects. Proficient in building and integrating software and hardware solutions using modern development tools and embedded platforms. Demonstrates strong analytical, problem-solving, and collaborative skills gained through academic projects and internship experience. Passionate about emerging technologies, including Artificial Intelligence and Machine Learning, and eager to contribute to innovative projects while continuously developing professional expertise.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C++
- **Web Development:** HTML, CSS, React, React Native
- **Embedded Systems & IoT:** ESP32, Raspberry Pi, Arduino UNO, Blynk
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, OpenAI, Anthropic (Claude)
- **Soft Skills:** Problem Solving, Critical Thinking, Collaboration, Communication

EXPERIENCE

Front-end Developer Intern

Certicode / SupSoft Tech | Internship / OJT

Technologies: React, Tailwind CSS, JavaScript, HTML, CSS, PHP, MySQL, Jira, Git, GitHub

- Contributed to the development and enhancement of InterTrack, a web-based internship management system for attendance tracking, project management, and intern performance monitoring.
- Developed responsive and user-friendly interfaces using HTML, CSS, JavaScript, React, and Tailwind CSS, translating UI/UX designs into functional web components.
- Assisted in migrating the platform from a traditional HTML/CSS/JavaScript and Firebase-based architecture to a more scalable stack using React, Tailwind CSS, PHP, and MySQL, improving maintainability and development efficiency.
- Collaborated with Full-Stack Developers, UI/UX Designers, QA, and Project Managers in an Agile environment to implement features and deliver project requirements.
- Participated in API integration, testing, debugging, and interface optimization to improve system functionality, responsiveness, and overall user experience.

PROJECT

Capstone Project: SMART-WATT: Energy Monitoring System with Raspberry Pi-Based Machine Learning for Non-Intrusive Appliance-Level Load Analysis

- Designed and developed the hardware architecture of an IoT-based energy monitoring system for real-time electrical power consumption tracking.
- Built and integrated hardware components, including sensors, ESP32 microcontroller configuration, system wiring, and Raspberry Pi connectivity for data acquisition and communication.
- Programmed the ESP32 to measure and transmit real-time voltage and current data for monitoring and processing.
- Collaborated with team members during system integration and the implementation of Machine Learning-based Non-Intrusive Load Monitoring (NILM) features.
- Conducted testing, troubleshooting, validation, and performance optimization to ensure reliable operation and accurate data acquisition.

Etch-a-Sketch Interactive Drawing Game

- Developed an interactive browser-based drawing application featuring a customizable grid, color selection tools, and canvas reset functionality.
- Implemented dynamic DOM manipulation and event-driven programming using JavaScript to create a responsive user experience.
- Applied front-end development principles, including user interaction handling, state management, and real-time visual updates.

EDUCATION

Bachelor of Science in Computer Engineering

Cebu Technological University – Danao Campus
2022 — 2026

Cumlaude | Best in Capstone Project

Accountancy, Business, and Management

Consolacion National High School - DC
2016 — 2022

With-Honors

ADDITIONAL INFORMATION

- Familiar with Agile development and version control (Git).
- Interested in IoT, front-end development, and automation.
- Technical Committee Member, ICpEP.SE – CTU Danao

CERTIFICATIONS:

- 2024 — Programming Java NC III – TESDA
- 2023 — Creative Web Design – TESDA
- 2023 — Robomania – (Participant)
- 2023 — ICpEP.SE Seminar – 'Git Good at Version Control
