

JUDITO N. PEPITO JR

COMPUTER ENGINEER

Santo Niño 2, Lamac, Consolacion, Cebu City, Philippines | 09661668608 | jude.apepito.e@gmail.com
<https://judsportfolio.netlify.app/>

PROFILE SUMMARY

Motivated and detail-oriented Computer Engineering graduate with experience in web development, IoT-based systems, and real-time data monitoring projects. Proficient in building and integrating software and hardware solutions using modern development tools and embedded platforms. Demonstrates strong analytical, problem-solving, and collaborative skills gained through academic projects and internship experience. Passionate about emerging technologies, including Artificial Intelligence and Machine Learning, and eager to contribute to innovative projects while continuously developing professional expertise.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C++
- **Web Development:** HTML, CSS, React, React Native
- **Embedded Systems & IoT:** ESP32, Raspberry Pi, Arduino UNO, Blynk
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, OpenAI, Anthropic (Claude)
- **Soft Skills:** Problem Solving, Critical Thinking, Collaboration, Communication

EXPERIENCE

Front-end Developer Intern

Certicode / SupSoft Tech | Internship / OJT

Technologies: React, Tailwind CSS, JavaScript, HTML, CSS, PHP, MySQL, Jira, Git, GitHub

- Developed responsive and interactive user interfaces for InterTrack, a web-based internship management system, delivering an intuitive experience for attendance tracking, project management, and intern performance monitoring.
- Implemented reusable front-end components using React, JavaScript, HTML, CSS, and Tailwind CSS, improving code consistency, maintainability, and development efficiency.
- Supported the migration from a traditional HTML/CSS/JavaScript and Firebase architecture to a scalable React, Tailwind CSS, PHP, and MySQL stack, contributing to improved maintainability and future scalability.
- Collaborated with Full-Stack Developers, UI/UX Designers, QA Testers, and Project Managers in an Agile environment to deliver features, integrate RESTful APIs, and meet sprint objectives.
- Optimized application performance by testing, debugging, and resolving front-end issues, resulting in a more responsive, reliable, and user-friendly web application.

PROJECT

Capstone Project: SMART-WATT: Energy Monitoring System with Raspberry Pi-Based Machine

Learning for Non-Intrusive Appliance-Level Load Analysis

- Designed the hardware architecture of an IoT-based energy monitoring system, enabling real-time tracking of household electrical power consumption.
- Built and integrated hardware components, including current and voltage sensors, an ESP32 microcontroller, and a Raspberry Pi, establishing reliable data acquisition and communication between devices.
- Programmed the ESP32 to measure, process, and transmit real-time electrical voltage and current data, supporting continuous monitoring and analysis.
- Collaborated with team members to integrate system components and implement Machine Learning-based Non-Intrusive Load Monitoring (NILM), enhancing appliance-level energy consumption analysis.
- Validated system performance through testing, troubleshooting, and hardware optimization, improving measurement reliability and ensuring accurate real-time data collection.

Etch-a-Sketch Interactive Drawing Game

- Developed an interactive browser-based drawing application using HTML, CSS, and JavaScript, featuring a customizable grid, color selection tools, and canvas reset functionality to deliver an intuitive drawing experience.
- Implemented dynamic DOM manipulation and event-driven programming, enabling real-time drawing interactions and responsive user interface updates.
- Applied front-end development best practices, including state management, event handling, and modular JavaScript design, resulting in clean, maintainable, and scalable code.

EDUCATION

Bachelor of Science in Computer Engineering

Cebu Technological University – Danao Campus
2022 — 2026

Cumlaude | Best in Capstone Project

Accountancy, Business, and Management

Consolacion National High School - DC
2016 — 2022

With-Honors

ADDITIONAL INFORMATION

- Familiar with Agile development and version control (Git).
- Interested in IoT, front-end development, software engineering, AI, Machine Learning and automation.
- Technical Committee Member, ICpEP.SE – CTU Danao

CERTIFICATIONS

2024 — Programming Java NC III – TESDA | 2023 — Creative Web Design – TESDA | 2023 — Robomania – (Participant) | 2023 — ICpEP.SE Seminar – 'Git Good at Version Control'
